

Where the 1220 may be called a real family ship, the 1280 with its 35 cm more width and 60 cm more length is even more comfortable. This spitsgatkotter turns out to be a real head turner with its elegant lines. Plate thickness of the hull is 5 mm and of the construction 4 mm. The hull is divided into watertight compartments by means of partitions and a steel floor above the engine room. The entire ship is completely finished: insulation, paneling. Technical design, upholstery, kitchen, electrical installation, etc. Blasted outside and equipped with a 2-component paint system. And the layout? You decide for yourself!
