

## Comfort Class

The Newport Bass is the ultimate Comfort Class. The original bass boats were used under heavy conditions. The planked hulls had a large aftdeck for the fishing activities and a front wheelhouse. The sharp bow had to stand serious waves. The fenderlist was actually the expended deckline. At higher speeds it also functioned as sprayrail.

Menken Maritiem translated the tradition of these fishingvessels in a brand new designed glassfibre weekender with all the comfort of a small yacht. With the 9 meter length the Newport Bass offers an amazing spacious and comfortable interior and cockpit. The professional design by Martin de Jager Yachtdesign gives the boat great sailing characteristics. The Newport Bass fully planes with the 260 HP engine and reaches a comfortable 24 knots!

- Polyester GRP hull, 100% hand lay-up, no spay work or vacuum
- For hull, coaming and deck 32 colours to choose
- Polyester deck, 100% hand lay-up with Balsa
- PU foam laminated stringers
