

The Hoor-Valk, is always one stroke ahead. With this ultimate cruising sailor you will feel completely free and one with the water. Our Hoor-Valk is fast, stable and sustainably produced. Clever innovations, such as the gas spring installation in the mast, the underdeck furling jib and simple quick reefing system also make the boat suitable for sailing alone.

All Hoor-Valken are built under vacuum injection, which results in a light, strong and rigid hull. The Hoor-Valk can sail high to the wind, is the fastest among polyfalcons and has a deeper cockpit, which keeps you dry longer on board.

## Specification

<b>Lengte</b>	< 10
<b>Materiaal</b>	Polyester
<b>Lengte scheepsromp</b>	6,65m
