

The Wajer 38S puts you in right in the middle of the action. Courtesy of the centrally positioned cockpit with hardtop bimini that gives you the freedom to move around on deck, go wherever you want to go and bring whatever you want to bring. Go diving, surfing, skiing or wakeboarding. Whatever's your pleasure, adventure awaits and it's yours for the taking.

The most striking aspect of this boat is the centrally located cockpit under a sturdy hardtop bimini. The principle of having a centre console has freed up a great deal of space on board for comfortable socializing and relaxing, and enhanced freedom of movement for all passengers.

Wajer Yachts is well-known for its innovation power. This new foil assist on the Wajer 38 and 38 S, developed by Van Oossanen Naval Architects, is proof to the point. Sailing these foiled Wajers makes for a more comfortable ride as they literally fly over the waves. There's less slamming on the water which means a drier ride, as it reduces spray considerably. In addition, she sails more stable and faster because the boat has less resistance. Preliminary technical research also has shown that the foil assist reduces fuel consumption with 10-20%, while maximum speed increases with 3-6% at equal power. We keep on developing the foil assist application for the most optimal foil assist technique.

The Wajer 38 S can be fitted with two powerful Volvo D6-DP 485 hp six-cylinder diesel engines in combination with IPS 650 dual pod propulsion. This extremely efficient joystick controllable propulsion system provides greater ease of operation and more precise steering, as well as a higher performance and a remarkable top speed of 47 knots. The exceptionally strong hull optimizes the dynamic sailing characteristics, while the unprecedented course stability and maneuverability at high speeds provide a sense of total control.

The Wajer 38 S caters to the active and spectators alike. Storage compartments - such as the smart Seabob storage - are integrated.

Specification

Lengte	10-12
Materiaal	Polyester
Inhoud watertank	150l
Waterverplaatsing	7,5ton
Gewicht	7,5kg
Diepgang	0,9m
Breedte	3,75m
Waste water tank	100l
Totaallengte	11,85m
Ontwerper	Wajer Yachts & Vripack Naval Architects
Motor actieradius	340miles
Vaarsnelheid	28kt
Maximum snelheid	47kt
CE-markering	B
Motorcapaciteit	1.300hp
Brandstoftank	730l
